

It's not a *pipe dream*, **Imagine delivers streaming risk analytics**, enhanced data feeds, and interactive risk services.

IMAGINE your data feed enhanced with real-time embedded analytics that you can offer to clients as a cutting-edge service.

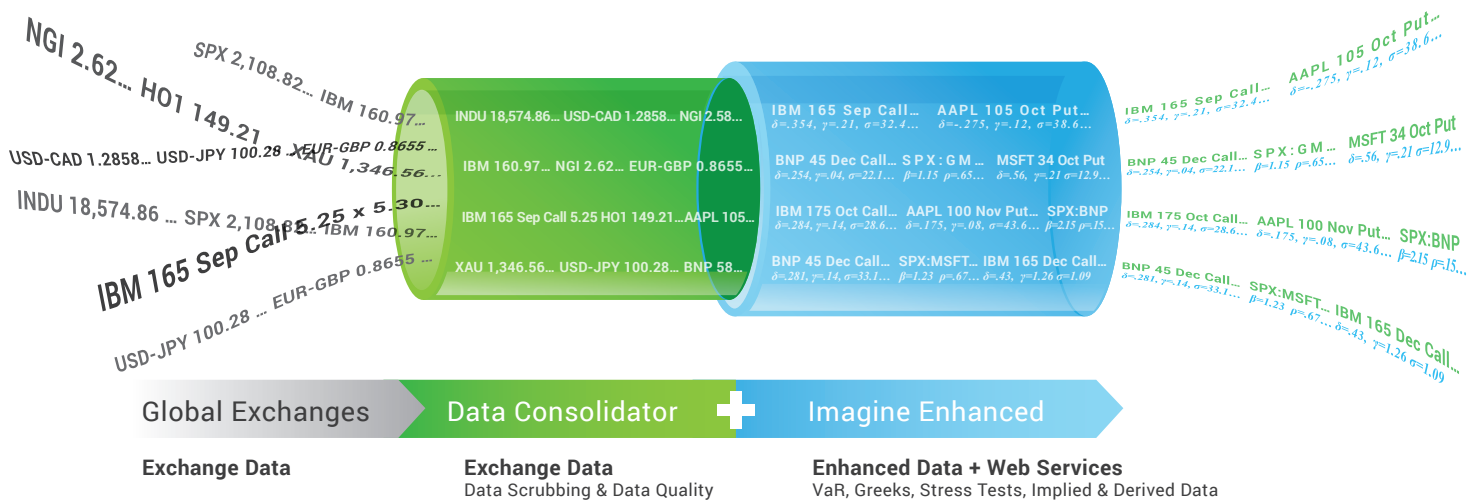

IMAGINE Enhanced Analytics

Imagine's state-of-the art risk analytics can quickly transform a standard terminal or vendor application into a powerful risk and compliance solution.

FinTech providers such as PMS, OMS, EMS, data and terminal providers can offer their clients the critical data they need, right on their desktops they use, every day.

Data terminal providers can quickly add pages of advanced analytics, portfolios views of VaR and stress tests, along with offering regulatory reporting services.

Upgrade Your Feed with State-of-the-Art Analytics

Streaming Analytics Data Feed

- ▶ Standardized analytics
- ▶ High-frequency throughput
- ▶ Pre-calculated analytics that simplify client-side application complexity
- ▶ Security-based information
- ▶ Existing feed user base empowered to quickly enhance offering

Interactive Services

- ▶ Custom ad-hoc analytics
- ▶ Flexible, extensible, unlimited
- ▶ Incorporates client data, such as portfolios and other confidential data
- ▶ Easily integrated into client workflows
- ▶ Modern web services technology easily integrates into desktop, browser and mobile platforms

IMAGINE is Secure

Imagine Software is certified ISO 27001:2013. This internationally recognized certification defines the requirements for establishing, implementing, maintaining, and continually improving security and is attestation that a systematic risk management process is used to manage and secure information. In addition to the ISO/IEC 27011:2013, Imagine's external auditors produce an annual SOC1 report that provides a description of our system and the suitability of its design, operating effectiveness and controls.

When combined, the data feed can stream customized client analytics further empowering end-users and the utility of the pipe.
